

Campus for Infosys

Iconicism of Sustainability: The client brief was simply- to create the world's most sustainable office building. The challenge is enormous – to consider Sustainability in its broadest sense; not just about conservation of water, energy and resources, but of tectonic perfection, of the detail, the process, and the wisdom of a thousand years of architecture of the region.

A prototype for innovation in the design of sustainable workplaces: The plan evolved from the notion of understanding the capacity of the site; a capacity determined by four functions- energy, water, geology of the land, along with essential rules of urban design pertaining to light, ventilation, shading, etc.
