

IT CAN'T JUST BE WI-FI IN PUBLIC SPACES THAT CREATES SMART CITIES. SO WHAT DOES?

Manit Rastogi, Managing Partner at Morphogenesis, mirrors his thoughts and says, “Even our metros are battling with fundamental issues such as sewage and garbage that are depleting the general quality of life”. Addressing them, he adds, requires a redefinition of how cities are set up.” Modi’s smart cities plan is working from the bottom up where it is bypassing basic infrastructural processes and making a 50 year jump at a smart city like Singapore. Every year during the monsoon, Indian metros get heavily clogged up which leads to massive traffic jams. India has been battling with the problem of poor and clogged drainage for years now but when is the national, state and local governments going to clean out the drainage to release their citizens of stress for three months of the year every year?
