Description sent by the project team. Through the Artisan project, Morphogenesis seeks to revive and emphasize traditional Indian craftsmanship. India is symbolized by the diversity of its art and culture, but with the changing paradigm, there is a great need to conserve these symbols which are under increasing threat of neglect. Craftsmanship, emerging from past skills and traditions, is inherent in Indian culture and is strongly representative of the global understanding of current luxury - that of handmade, bespoke, which speaks of its provenance. In addition, the luxury in this project is expressed by the skill and beauty of the spatial configurations, giving the space an experimental quality through the incorporation of handicrafts, materials, method and design.
